

# Talk About Theory

# An Objective Approach

- Social Scientists – Why an event produced a specific sentiment and whether it resulted in action.
  - After observation, a theory is identified or constructed to offer insights about what it was observed.
- Resonance Principle of Communication
  - Persuasion – arguments v. memories
- Theory Validation
  - “Objective test to identify if a theory is faulty” (p.14)
    - Theory + Research

# An Interpretive Approach

- Archetypal Myths

- Draw upon universal experiences
  - Carl Jung – “collective unconscious”
    - Michael Osborn – Archetypes touches off “depth responses” that emotionally resonate at the core of our being (p.15)

# Objective vs Interpretive Approach

- Approaches to communication study differ in:
  - Starting point, Method and Conclusion
  - Assumptions about ways of arriving to knowledge
  - The core of human nature, questions of value, and the purpose of having theory
- Objective → Scientist → Objective Scholar
- Interpretative
  - “[A]ll rhetorical critics do interpretative analysis, not all interpretative scholars are rhetoricians” (p.16).
    - Interpretative Scholars
    - Rhetoricians, humanists, postmodernists, or critical scholars

# Truth vs Multiple Realities

## ▪ Epistemology

- “[W]e all inevitably make assumptions about the nature of knowledge” (p.16).

## ▪ Scientists

- Good Theory = Faithful representations of the way the world really is.
- Science seeks to be bias-free – evidence should speak for itself.
- No one person can know it all → Pool of findings to build a collective body of knowledge about how the world works.
- “[O]nce a principle is discovered and validated, it will continue to hold true as long as conditions remain relatively the same” (p.16)

## ▪ Interpreters

- Truth is socially constructed through communication
  - “Text may have multiple meanings” (p.17).

# Determinism vs Free Will

## ■ Question of Human Choice

- Hard-line determinists – every move we make is the result of heredity and environment.
  - Scientists – Stress the forces that shape human behavior
- Free will purists – every human act is ultimately voluntary (p.17)
  - Interpretative Scholars
    - Focus on conscious choices made by individuals

## ■ Language

- Reflects theorists views of human nature
  - “I had to” v. “I decided to” / “In order to” and “So that”
- “[A]s individual freedom goes up, predictability of behavior goes down” (p.18)

# Objective vs Emancipation

- “Significant decisions are value laden”
  - Value – priorities and issues of relative worth.
    - “Traffic light that guide what we think, feel, and do” (p.18)
- Behavioral Scientists → Empirical Evidence
- Critical Interpreters → “[K]nowledge is never neutral” (p.19)
  - Seeks to emancipate = liberate people from oppression of any sort
- Stan Deetz
  - General Communication Theories have two priorities:
    1. Effectiveness – successful communication / persuasion
    2. Participation – increase point of views / difference, opposition and independence

# Universal Laws vs Interpretive Guides

## ■ Behavioral Scientists

- “Pin down universal laws of human behavior that cover a variety of situations” (p.19)
  - Theory Testing
    - Hunch of ideas about how the world works → Hypothesis → Test after Test

## ■ Rhetorical Critic

- Strive “to interpret a particular communication text in a specific context” (p.19)
  - “[E]xplores the web of meaning that constitutes human existence” (p.20)
  - No Theory Testing
    - Theory tells “what to look for,” “what to make of it,” and “whether to consider it significant”

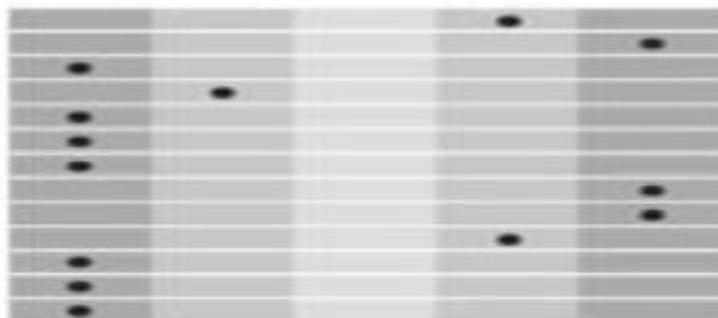

\*Next: Classification of Communication Theories According to Objective /Interpretive Worldview (p.22)

## Objective

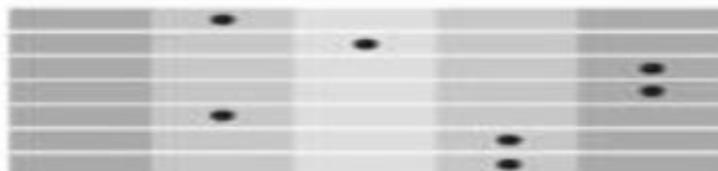

## Interpretive

**Interpersonal Communication**

- Symbolic Interactionism
- Coordinated Management of Meaning
- Expectancy Violations Theory
- Constructivism
- Social Penetration Theory
- Uncertainty Reduction Theory
- Social Information Processing Theory
- Relational Dialectics
- The Interactional View
- Communication Privacy Management
- Social Judgment Theory
- Elaboration Likelihood Model
- Cognitive Dissonance Theory

**Group and Public Communication**

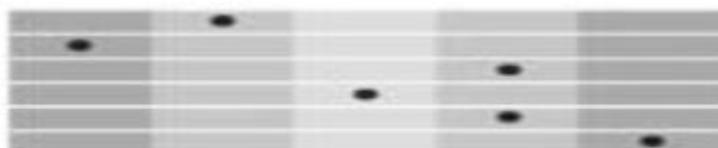

- Functional Perspective on Group Decision Making
- Symbolic Convergence Theory
- Cultural Approach
- Critical Theory of Communication Approach
- The Rhetoric
- Dramatism
- Narrative Paradigm

**Mass Communication**

- Media Ecology
- Semiotics
- Cultural Studies
- Uses and Gratifications
- Cultivation Theory
- Agenda-Setting Theory

**Cultural Context**

- Communication Accommodation Theory
- Face-Negotiation Theory
- Speech Codes Theory
- Genderlect Styles
- Standpoint Theory
- Muted Group Theory

Making a good  
theory

# Making A Good Objective Theory

- A good objective theory:

1. Predicts what will happen

- We are dealing with things we can see, hear, touch, smell and taste over and over again
- Probability and tendencies → Not absolute certainty
  - A specific type of communication triggers a particular response
  - People will use certain types of communication depending upon pre-existing factor

2. Explains an event or human behavior to draw order to an existing chaos

- Abraham Kaplan
  - “[T]heory is a way of making sense out of a disturbing situation”

# Making A Good Objective Theory

## ■ Social scientists add four more criteria:

1. Relative simplicity – Occam's Razor or Rule of parsimony
2. Testability through Hypothesis (es) – Falsifiability
3. Practical utility – Useful
4. Quantifiable research – Experiments and Surveys

# Making A Good Interpretive Theory

- Although there is no six-point set of criteria, interpretive theories should accomplish some or all of these functions:
  - Identification and clarification of values – Power relations and structures
  - Create new understanding of people – Self-referential imperative
  - Inspire aesthetic appreciation – Organized creativity
  - Stimulate agreement – Widespread debate and analysis
  - Reform society – Challenge to the Status Quo
  - Conduct qualitative research – Textual Analysis and Ethnography

Thanks
